PROJECT SPECIFICATION**Traffic Sign Classification****Dataset Exploration**

CRITERIA	MEETS SPECIFICATIONS
Visualization	Student performs a visualization on the dataset.

Design and Test a Model Architecture

CRITERIA	MEETS SPECIFICATIONS
Solution Design	Student thoroughly discusses the approach taken for deriving and designing a model architecture fit for solving the problem given.
Model Architecture	Student provides sufficient details of the characteristics and qualities of the architecture, such as the type of model used, the number of layers, the size of each layer. Visualizations emphasizing particular qualities of the architecture are encouraged.
Preprocessing	Students provides sufficient details of the preprocessing techniques used. Additionally, the student discusses why the techniques were chosen.
